Airstop Elasto Adhesive Tape

DESCRIPTION

Isocell Airstop Elasto Adhesive Tape is slightly expandable, suitable for many areas including vapour retarders, barriers, OSB, DWD panels, wood, masonry and metal, indoors and outdoors. Prime masonry with **Isocell Bubi LF Bonding Primer** if necessary. Due to its malleability it is suitable for around small pipe and wire penetrations.

BENEFITS/USAGE

- Adhesion of vapour retarders & barriers
- Joints of OSB & DWD panels, indoors & outdoors
- Joint and connections with wood, masonry & metal
- For adhesion to masonry use a primer if necessary
- High proportion of adhesive
- Slightly expandable (necessary when there is movement in the construction component)
- Adapts to the texture of the surface, i.e. better adhesion on surfaces that are not smooth, such as OSB

PREPARATION

Any surface being adhered to should be properly prepared and must be free from dust and grease and substrates must be dry. For porous substrates such as XPS, concrete, masonry, etc., please use **Bubi LF Bonding Primer** where necessary. The greater the pressure applied, the better the performance of the adhesive tape.

APPLICATION

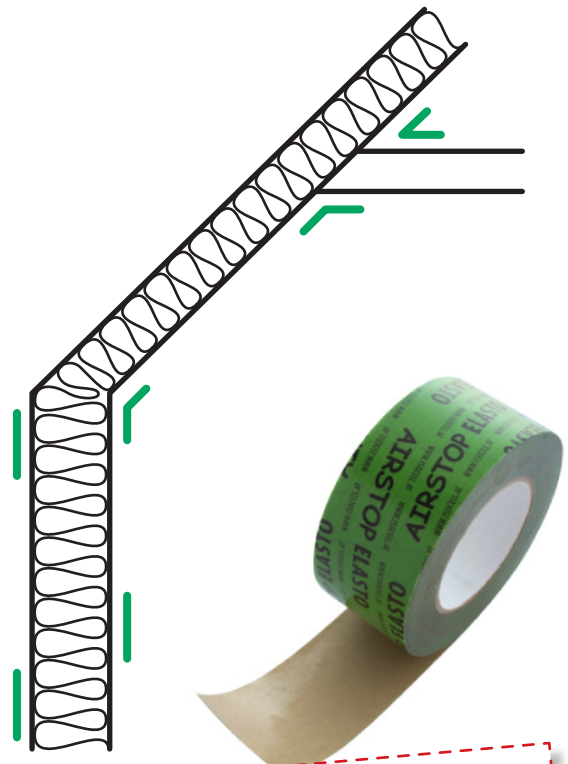

Apply off the roll or cut to desired length. Press firmly into position. For further information see our application guidelines.

NOTE

Elasto Adhesive Tape functions as a seal and not as a mechanical fixing. The pure acrylate adhesive used does not contain resins or other additives that could cause the adhesive film to become brittle and therefore **this product is extremely resistant to ageing**. Please pay attention to our Guidelines for Installation!

PROPERTIES

Composition	PE base material with polyester fabric and pure acrylate adhesive
Roll Widths mm	50 60
Roll Length m	25 25
Rolls/Carton	7 6
Temperature Resistance	-40°C to +100°C
Working temperature	From -5°C
Resistance to Ageing	20 years
Storage	2 years, cool and dry
Colour	Green transparent with black imprint

**AN EXCELLENT ALL ROUND
TAPE - USE INDOORS & OUT**
